Common Questions and Sample Answers for Subway Application Tests

While each transit authority may have unique questions, common themes tend to emerge. Below are typical questions with suggested approaches and sample answers.

Mechanical and Technical Questions

- **Question:** What is the purpose of the brake system in subway trains?

Sample Answer: The brake system in subway trains is designed to safely and efficiently reduce the train's speed or bring it to a complete stop. It ensures passenger safety, prevents accidents, and allows for controlled movement, especially in emergency situations.

Mathematical Skills Questions

- **Question:** If a train travels 60 miles in 2 hours, what is its average speed?

Sample Answer: The average speed is calculated by dividing the total distance by the total time. So, $60 \text{ miles} \div 2 \text{ hours} = 30 \text{ miles per hour}$.

- **Question:** A maintenance task requires 3 liters of oil, and you have a container with 12 liters. How many such tasks can be completed with the available oil?

Sample Answer: Each task uses 3 liters, so $12 \text{ liters} \div 3 \text{ liters} = 4$ tasks can be completed.

Reading Comprehension Questions

- **Question:** Read the following safety instruction: "Before starting the train, ensure all doors are closed and the emergency brakes are released." What should you do before starting the train?

Sample Answer: Before starting the train, I should verify that all doors are properly closed and that the emergency brakes are released to ensure the train operates safely and smoothly.

Situational Judgment and Behavioral Questions

- **Question:** A passenger is upset because the train is delayed. How do you handle the situation?

Sample Answer: I would listen attentively to the passenger's concerns, provide clear and honest information about the delay, and offer assistance or alternatives if possible. Maintaining a calm and respectful attitude helps de-escalate the situation and ensures a positive customer experience.

- **Question:** During a routine inspection, you notice a minor fault on a train component. What steps do you take?

Sample Answer: I would document the issue according to safety protocols, inform the maintenance team promptly, and ensure the train is taken out of service if necessary until the fault is repaired, prioritizing safety above all.
