Welder Qualification

AWS D1.6 mandates that welders must be qualified through tests that demonstrate their ability to produce sound welds in accordance with the WPS. The qualification process involves:

- Performing test welds in a controlled environment
- Subjecting welds to visual inspection and non-destructive testing (NDT)
- Maintaining records of qualification

Qualified welders ensure consistent quality and compliance with the code's requirements.

Inspection and Testing

Quality assurance is integral to AWS D1.6, which specifies various inspection methods, including:
